

2LIFE® - THE SECOND LIFE OF YOUR BOTTLES

Pronounced "Second Life", 2LIFE® is an rPET yarn made exclusively from post-consumer recycled bottles.

The bottles used for the creation of 2LIFE® are only collected in Europe and their origin is certified by an independent organisation.

From the collection of the bottles to the creation of the yarn, the entire process is carried out in western Europe, which allows us to work in a short circuit and thus considerably reduce the carbon impact of our 2LIFE® yarn.

2LIFE® - FROM BOTTLES TO RECYCLED YARN

Collection of PET bottles «post-consumer»

Sorting and washing of bottles

PET flakes (shredded bottles)

rPET pellets

2LIFE® yarn

2LIFE® VS CLASSIC POLYESTER - ENVIRONMENTAL SAVINGS

CO ₂ Emission	Energy needs	Water consumption	Waste production
-32%	-60%	-94%	-100%

PRODUCING 1KG OF 2LIFE® YARN IS:

- Recycle**
27 bottles (1,5L)
- Valorise**
2.4 kg of wastes
- Low consumption**
of water (<50L)
- Avoid**
the release of 2.2 kg of CO₂
- The use of NO pesticides**

2LIFE®, A TECHNICAL AND RESPONSIBLE YARN
